

Use your story to build partnerships

1

Know Your Story.

Your project is a story of how God is using you to make a difference in your community. Look back on your mission trip and see evidence of the beautiful story God is writing. When you invite others to join you in service, think of creative ways to tell them your story and invite them into it.

2

Share Your Story.

The Servers: Research existing organizations already doing something you're passionate about. How can you work together with them?

Wannabe Servers: There are others like you in your church, school and community who want to serve but aren't sure where to start. Talk about your desire to serve with others to find people to partner with.

3

Invite Others Into Your Story.

Here are four ways people can give to your project or passion:

TIME - Many hands make light work! Invite others to use their time to serve alongside you.

TALENT - Listen to others' experience and knowledge in the area you're passionate about.

TREASURE - Some people will join your project through giving money, donating supplies or offering discounts.

TALKING TO GOD - Never underestimate the power of prayer!
